

INTERNATIONAL FINANCIAL MARKET TRADING

COURSE OBJECTIVES

This course is designed to provide participants with the relevant skills to enable them trade effectively on the international financial markets in such instruments as Stocks, Indices, Cryptocurrencies, Gold, Crude Oil and Commodities.

The course is also useful to those who may wish to branch into a new area within their field of expertise or simply change career. The course in International Financial Market Trading is a robust and comprehensive program which focuses on major stock markets (such as New York, London, Shanghai and Hong Kong Stock Exchanges), trading software analysis and domination, technical analysis and the law of charts, decoding the market indicators, trading strategies, stock market econometrics, price modelling, secrets in approaches to price forecasting, portfolio selection and management as well as risk management.

After completing the course, the participants should:

- have a practical and theoretical understanding and a good appreciation of International Financial Markets and how they operate.
- be well equipped to analyze and trade in financial instruments personally and independently in the comfort of his/her home or office.
- be able to effectively manage Investment Portfolios.
- reliably project prices for Stocks, Bitcoin, Crude Oil or any other financial instrument a year or more ahead.
- enhance profitability of Funds being managed.
- acquire the ability to reveal hidden and proven profitable approaches in trading on New York and London Stock Exchanges.
- create a lucrative source of income.

NATURE OF THE COURSE

This is a hands on program (about 90% practicals & 10% theory), aimed at providing skills to enable participants to be self-employed whether as students in school or employed. All earnings are foreign currency denominated and Traders will enjoy gains on foreign exchange transactions, access to new advanced trading software, trading account support engineering services, weekly and daily signals of over 2,600 stocks or indices listed on the New York and London Stock Exchanges (NYSE & LSE).

WHO SHOULD ATTEND

The International Financial Markets Trading is designed for New Investors, Retail Traders, Tertiary students, Public Servants, Retirees, Financial Service Professionals (Financial Analyst, Hedge Fund Managers, Investment Bankers) and those who would like to further their education in the area of finance or for those who are considering making a career change and would like to work in the field.

CERTIFICATION

Participants who successfully complete the program will be issued a Certificate in International Financial Markets Trading.
